

TIBERAL[®] Ornidazole

Solution for Infusion and Tablets

- ***Ampoules:***
 - **500 mg / 3 ml: box of 10 ampoules**
 - **1000 mg / 6 ml: box of 10 ampoules**

- ***Tablets: box of 3, 10 or 50***

Ornidazole is a 5-nitro-imidazole derivative. Ornidazole is active against protozoa and anaerobic bacteria and is used in the management of susceptible protozoal or anaerobic bacterial infections.

The antimicrobial activity of Ornidazole is due to the reduction of the nitro group to a more reactive amine that attacks microbial DNA, brings about loss of helical structure of DNA and subsequent DNA breakage thus inhibiting further synthesis and causing degradation of existing DNA.

Dosage: depending of the pharmaceutical form and indications.
